Placement Policy Document for 2027 passing out
for UG & PG Programs

As the Training and Placements Team at an autonomous institution, we aim to balance students' interests, recruiters' expectations, and the college's reputation. To ensure "fair opportunity," we wish to move away from chaotic "first-come, first-served" practices toward a structured "One-Student-One-Job" philosophy with "Dream" exceptions. The following guidelines govern the revised placement process.

1. The Core "Fairness" Policy:

A tiered offer system is introduced to ensure a fair distribution of placement opportunities, optimize overall placement outcomes, and provide greater access to employment opportunities for all eligible students.

- The "**Base**" Offer: Once placed, students may participate only in eligible Dream & Super Dream opportunities, subject to the conditions in the policy.
- The "**Dream**" Exception: A student with a Base offer can apply to a "Dream" company only if the salary package is significantly higher. The package must be at least 2x Base CTC and less than 3x. Each student may receive one Dream offer.
- The "**Super Dream**" Exception: Reserved for top-tier products and Core companies. The package must be three times (3 x Base CTC) the Base offer, or equal to or above 20 LPA, whichever is higher. Only one such upgrade should be allowed per student to prevent them from blocking too many slots.

All eligible and registered students may attempt the Placement Process in accordance with the above-mentioned policy. Any exception to the **Dream** or **Super Dream** job opportunity policy will be considered only after the student submits a duly signed undertaking.

2. Discipline Guidelines:

The Blacklist Policy: Strict penalties will be enforced against students who don't adhere to the placement rules.

- Registering for a drive and not attending Pre-Placement Talks, the Test, or Interviews will result in a 2-week block.
- Registering for a drive using false or incorrect data will result in a 2-week block.

3. The Placement Process Flow:

A standardized communication framework to ensure fair and consistent dissemination of placement information to all eligible students.

- 1) Job Announcement (JA): Shared via a central portal (Contineo, along with a Google Form and a WhatsApp group) with the full JD, CTC, and eligibility.
- 2) Student Consent: Students must "Opt-in" to specific companies rather than being automatically considered.
- 3) Selection Process: Results tracking must be real-time and public (on the internal portal) to maintain trust.

4. Code of Conduct for Students

Presentability is the minimum standard the employer expects from every student during the hiring process. Also, expect each of our students to act as a Brand Ambassador for our Institute. In light of that, our guidelines state:

- Professionalism & Integrity throughout the hiring process
- Formal Dress Code
- Adhering to guidelines and instructions religiously

The shortlisting process for candidates is entirely conducted by the recruiting companies, based on the student's eligibility and performance. The Placement Department does not influence the shortlisting decisions.

Wishing you all the very best!
